

HSE LIBRARY - HOW TO... SEARCH FOR JOURNALS ON E-LIBRARY

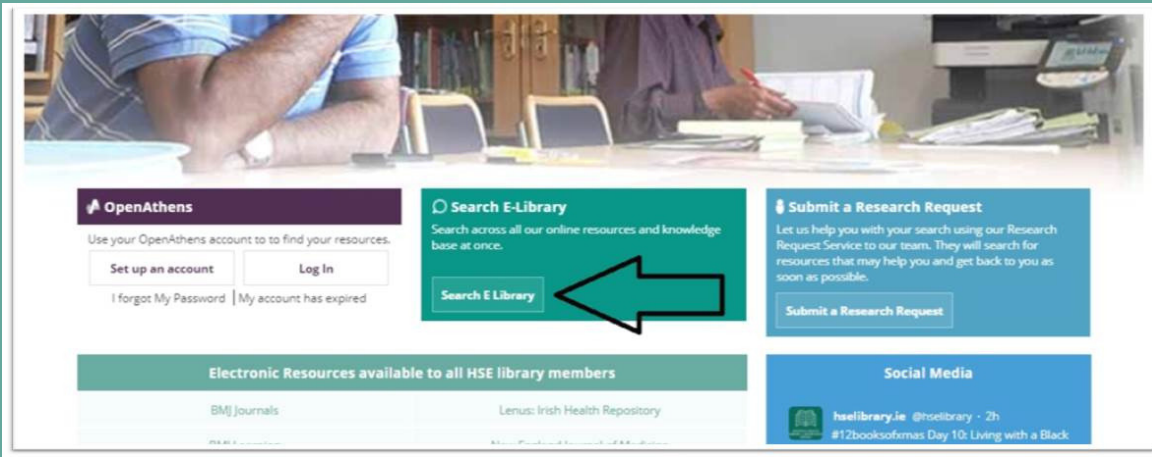

The e-library tool on the HSE Library website allows you to search for availability and access to journals on HSE Library resources.

The e-library journal search acts as an A-Z for searching journals

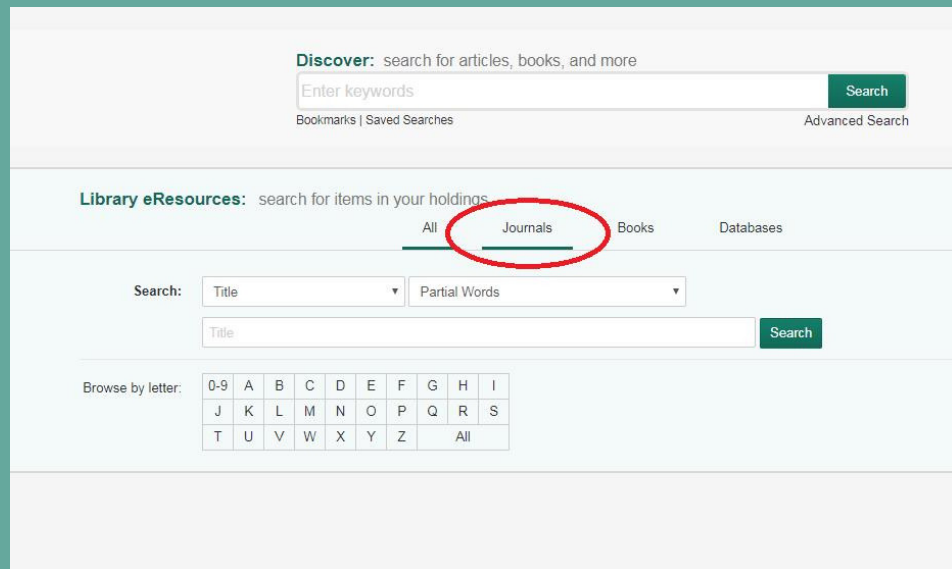

Step 1

Click 'Search e-library' to open the e-library search

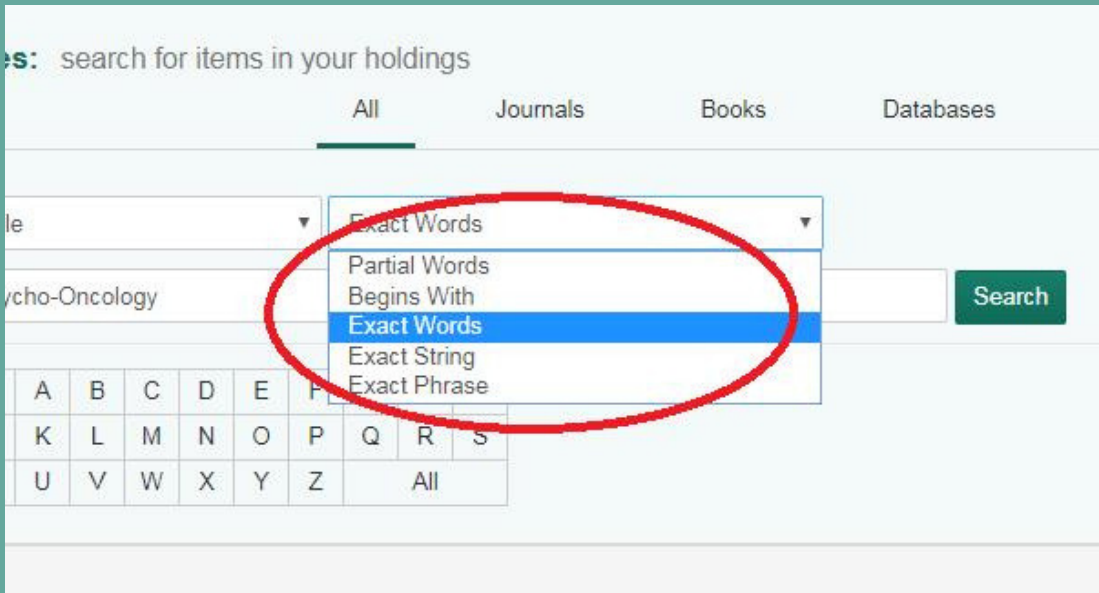

Step 2

Select 'Journals' and enter the exact title of the journal you are looking for in the title field then select 'exact words' from the drop down menu.

Step 3

Select 'begins with' or 'partial words' if you just want to search for any journal with a specific word in the title. Then hit 'search'

Step 4

Results will show each journal holding matching the search terms. In the 'Access Information' you will see details of the database or collection the library provides access to this title through. Click the link to access the journal (this should link directly).
