# HEALTH LIBRARY IRELAND NEWS

ISSUE 26 • JUNE 2022

## HLI TO REPRESENT HSE ON INTERNATIONAL STAGE

Over the past few months, HLI has continued to meet the information needs of HSE staff, students on clinical placement and other partner organisations through a variety of value-added services.

These include literature searches, summaries of evidence on priority topics, training in searching and use of eHealth library resources, subject expert support on working groups and onsite library facilities across the HSE.

Recent highlights include a 'Navigating the Evidence' webinar on 31st May for all nurses and midwives in Ireland, delivered in partnership with the Chief Nursing Office of the Department of Health and the HSE ONMSD. It was accredited by the Nursing & Midwifery Board of Ireland, with approximately 200 attendees.

More webinars will be provided during the coming months for different users such as managers and doctors, including a group of some two hundred Ukrainian doctors recently arrived in Ireland.

Library services are back to normal and arranging onsite training from publishers including ClinicalKey, UpToDate and others. On 17th May an online webinar, "Fake News to 'infodemic' - five interesting years for librarians" was hosted by HLI in conjunction with the European Association for Health Information and Libraries. Librarians from around the world will meet in Dublin in July for the biggest international library conference in the world, the IFLA World Congress. This will be held in the Dublin Convention Centre with a number of posters presented by the HSE HLI team. I will be presenting a paper during a dedicated session about "Innovation in Irish Health and Academic Libraries" together with librarians from the Irish university sector. Our partnership with key internal stakeholders such as NDTP; NMPDU; HSCP; OoCIO; Digital Transformation and external partners such as IBM, Interleaf Technology and Section 38 organisations will be a key feature.

HLI has finalised a communication policy which underpins all our services. For doctors on rotation, please get in contact with your local HLI library to avail of the many resources available to you.

# EnergyPod Touches Down in Naas General Hospital

A MetroNaps EnergyPod is now available for all Naas General Hospital staff. The official launch for the EnergyPod was held on Thursday, May 12th and was very well received. Health Library Ireland staff who attended the launch were Aoife Lawton, Bennery Rickard, Ronan Hegarty and Jean Rickard.

**Ronan Hegarty**  
**Executive Librarian**  
**Naas General Hospital**

The EnergyPod is located just outside the library and is the world's first chair designed for napping at work.

All features of the pod are designed to help busy clinical staff relax and recharge.

The EnergyPod is funded by the National Doctors Training and Planning (NDTP) in association with Health Library Ireland.

Naas General Hospital is the 4th HSE hospital to have an EnergyPod installed, joining St Luke's General Hospital, Kilkenny; Cork University Hospital; and University Hospital Limerick.

Research has shown that a short nap at work can help employees feel more alert as well as offer many other performance benefits.

Companies that have used EnergyPods to great effect include the likes of Google, Nike and Procter & Gamble. They have been installed in hospitals, universities, factories and airports worldwide.

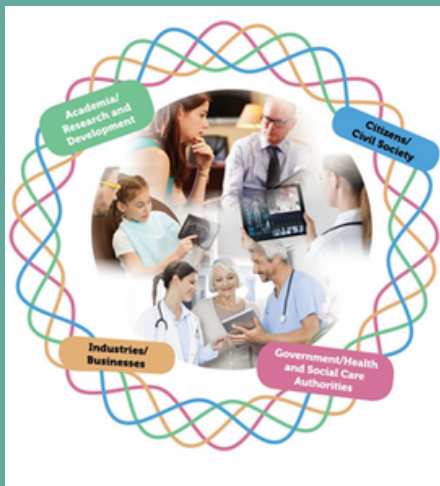

Demonstrating the EnergyPod

# HSE National Central Repository update

**Emer Quigley, Project Manager  
PPPG Project Team**

The National 3PG Repository Team (3PGs indicate policies, procedures, protocols and guidelines and may be clinical or non-clinical) is part of Health Library Ireland, based at Dr Steevens' Hospital in Dublin.

We are in the early project development stage to set up the National Central Repository (NCR) which will provide a single trusted location on the HSE website to access, store and manage National Clinical Guidelines and National 3PGs.

Oversight of our project work is provided by the National 3PG Governance Group, chaired by Dr Ana Terrés, Assistant National Director, Head of Research and Evidence.

## **The work of National 3PG Repository Team is divided into two distinct phases:**

### **1. Set-up of the National Central Repository**

The NCR working group is chaired by Aoife Lawton, General Manager, Health Library Ireland. Consultation is underway with a range of internal and external stakeholders including the Office of the Chief Information Officer, Digital Communications and other advisory groups to scope out the requirements for the NCR.

The consultation process includes defining the types of National 3PGs that will be stored on the NCR, whether a digital template would be of value to those tasked with writing and developing national documents, and if an electronic workflow system would improve the management, approval and control of current national document lifecycle processes.

The long term location of the existing HSE COVID-19 repository will also be considered at a later point in the project, a joint decision with [Clinical Design and Innovation and Health Library Ireland](#).

### **2. Review of National Framework for Developing PPPGs and Template**

Aligned with the project to set up the NCR, a review of the existing [HSE National Framework for Developing PPPGs](#) (2016) and template is under way by our working groups, led by the National 3PG Governance Group.

This is a parallel process to the set-up of the NCR and is essential to inform the needs analysis. Following the review and a national consultation process, recommendations will be made to replace the framework with a user-friendly practical manual for staff.

# Webinar for nurses and midwives in Ireland

## Nicola Fay, Library Resources Manager

On 31st May, Health Library Ireland (HLI) supported by the Dept. of Health CNO (Chief Nursing Office) and the HSE's Office of the Nursing and Midwifery Services Director (ONMSD) held an online event to promote resources available through HLI website.

It was the first such event organised online by the HSE Library Service specifically for nurses and midwives in Ireland.

We had a record number of registrations thanks to the wide circulation of our poster.

The QR code directed participants directly to the registration page on the Training Calendar of the Library website [www.hselibrary.ie](http://www.hselibrary.ie)

Thanks to our partnership with the CNO's Office in the Dept of Health and ONMSD HSE, our ability to communicate widely to all nurses and midwives was greatly enhanced.

On the day, we had close to 200 in attendance at the live event online from 09:15 to 13:00.

The Webinar included the following:-

1. Presentations from the Chief Nursing Officer, Department of Health and Nursing & Midwifery Services Director ONMSD

2. Overview of HSE Health Library Ireland eHealth Library and services by Aoife Lawton, General Manager, HLI

3. Training in Searching for Evidence delivered by HLI Librarians

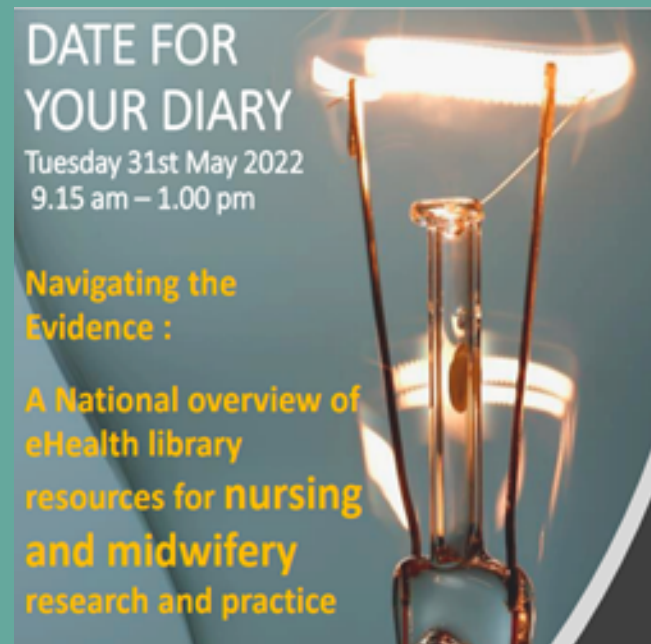

4. Vendor led training in a number of online resources listed including:-

- The Cochrane Library
- Royal Marsden Manual of Clinical Procedures
- BMJ Best Practice and BMJ Learning
- Clinical Key
- CINAHL
- Embase
- Proquest Health Research Premium

All recordings and PowerPoint slides from the Webinar are available at the following link:-

**Navigating the Evidence: PPT and recordings 31.05.2022**

Alternatively, copy and paste the URL into your browser: <https://hse-ie.libguides.com/nandnm22>

## National Central Repository Staff Survey

The HSE are looking to add structure and transparency around the creation, authorization, review and consumption of documents, and transform the process to a complete online system. Work is in progress to create a central location on the HSE website to house National Policies, Procedures, Protocols and Guidelines (PPPGs), clinical and non-clinical, where users are confident they are reviewing the most up to-date-documents.

# STAFF SURVEY

We would like to know what features and capabilities staff would value in the NCR to inform our programme of work. This short survey will take no longer than five minutes to complete. All staff of the HSE and HSE-funded services are invited to complete the survey. Link to NCR Staff Survey at <https://surveys.hse.ie/s/NationalCentralRepository/>.

For assistance with queries on the NCR project or the current review of the existing National Framework to Develop PPPGs, please contact the National 3PG Repository Team at [pppg.office@hse.ie](mailto:pppg.office@hse.ie).

## Health Library Ireland - Procurement Developments

**Melanie Surkau, Librarian  
Kerry General Hospital**

I recently started as Library Resource Manager after being the librarian in UHK Tralee for just over two years and working on the Evidence Team. Before joining HLI, I used to work in management in a large university library system in Berlin, Germany.

The primary focus of my new position is procurement of electronic library resources, and also of library systems and services, whilst I also have line management responsibilities in HLI South.

The main projects for the rest of 2022 in procurement are two EU tenders, one for the hosting and services around our existing library system KOHA, the other for a potentially new discovery system.

We will be focusing on the introduction of interlibrary loan and document supply through KOHA, re-organising it into a centralised service; also the further implementation of Consortia Manager (our backend system for the administration of contracts, licences and subscriptions) in close cooperation with the HLI Digital Team, so that we can use all its functionalities.

# News in Brief

## Journal of Forensic Nursing<sup>®</sup>

The Official Journal of the International Association of Forensic Nurses

Health Library Ireland has recently acquired Journal of Forensic Nursing, for use by the staff of the Sexual Assault Treatment Units (SATUs) in the HSE.

The SATUs in Dublin, Galway, Mullingar, Letterkenny, Cork and Waterford will have full on-site access to Journal of Forensic Nursing to drive improvements in practice.

The Journal of Forensic Nursing (JFN) addresses health care issues that transcend health and legal systems by articulating nursing's response to violence. Journal topics include interpersonal violence (sexual assault, abuse, intimate partner violence); death investigation; legal and ethical issues; forensic mental health nursing; correctional nursing; and emergency and trauma nursing.

Access will be via the HLI website, and any queries can be directed to [hli@hse.ie](mailto:hli@hse.ie).

The IFLA Health and Biosciences Libraries Section, in collaboration with the IFLA Evidence for Global and Disaster Health Special Interest Group and the Health Sciences Libraries Group of the Library Association of Ireland, are co-sponsoring a satellite meeting on 29 July in conjunction with the 2022 IFLA World Library & Information Congress.

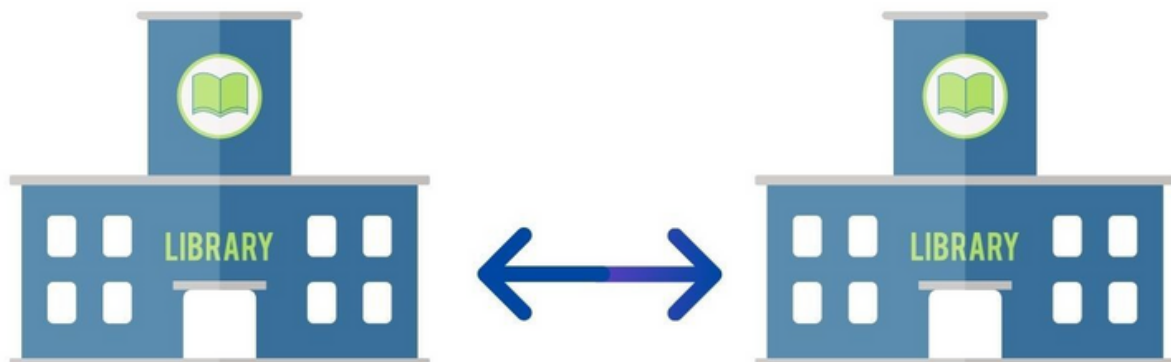

The theme of the meeting is "Exploring How Open Science and Open Access Influence the Spread of Health Misinformation and Disinformation and How Librarians Can Help". This half-day seminar is being hosted by HSE Health Library Ireland in Dr. Steevens' Hospital Boardroom.

# Dr Steevens' Library Development

So leaving aside the new soft focus furnishings, smart bit of rug and a nice lick of paint, how is the about-to-be re-booted Dr Steevens' Library different from the old one?

Firstly, a clarification. Dr Steevens' Library serves library users far beyond the staff based onsite. It also includes any national offices, for example, those based at Parkgate Street, Jervis Street, Merchant's Quay, Palmerstown etc.

This more defined remit as a 'corporate' library does mean that we are far better positioned to provide customised library services to our audience and perhaps also to develop the way that we look at and plan our services alongside our library users, rather than in isolation to them.

**Gethin White**  
**Librarian, Dr Steevens' Hospital**

Anne Kearns and Elaine Scanlon get the word out about the refurb

The new approach envisages Dr Steevens' Library being something of a hub/incubator which can take the input from a number of key national stakeholders within the organisation who are based in our HSE library postcode and channelling the ideas/needs/input into our National Library Teams.

This is already happening with key referrals being directed into the Knowledge Support Team, training sessions being formulated jointly with the Info Skills Team and enquiry work being developed alongside the Evidence Team.

Obviously, some work will remain local to our library and there isn't a magic formula to getting the balance right but it does ensure our library is primed to be a focal point for a number of things, which is exciting.

Finally, having 'glossed' over the work that has been done to our physical library space, this repositioning will also influence our services significantly. Dr Steevens already hosts the annual Open Access awards but the revamped space means that the library is now far better fitted to launching other events. Our user base tends to be a fairly mobile, dynamic one and the library is now better configured as a working space to support their multi-layered needs. There'll be more on this in our next newsletter.

Elaine and Anne put the finishing touches to the new-look library

# HLI Staff Wellness Day 2022

**Marguerite Farrell, Senior Library Assistant, Regional Hospital Mullingar**

Marguerite Farrell

Our third virtual HLI Staff Wellness Day took place on 8th June 2022. The event was organised and hosted by the Events Team via Webex. Our objective this year was to host a Wellness Day that encouraged staff participation and engagement.

National Health Librarian Aoife Lawton opened the Wellness Day with an introductory talk about the importance of physical, mental and nutritional health, and the methods recommended to accomplish this.

The fun started with a game called "Judge a Book by Its Cover"; the aim of the game was to identify 10 books by the cover page alone. There was a time limit for each book so attendees had to be quick to submit their answer. The winner of this event was Bennery Rickard.

Our resident HLI garden expert Emma Quinn continued to awe with her gardening expertise in our gardening slot. This year Emma was accompanied by new staff member Shona Nolan and the ladies demonstrated how to make a tepee with bamboo sticks, plant sweet pea and clematis and showed three ways to grow three plants. Participants were invited to engage in a short "Get Gardening" competition where they had the opportunity to win seed packets generously donated by Emma.

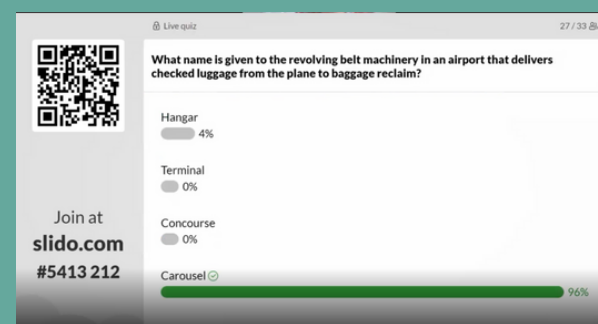

The tricky catchphrase round

Next up was the old favourite "Catchphrase" hosted by Natasha Smith. The two rounds of "say what you see" clips led to some good humoured banter among the participants before Mary Thompson was crowned the overall Catchphrase champion.

After a short break anticipation mounted when we held a raffle for a €100 gift voucher kindly sponsored by The Book Nest Sligo. Each

participant was given a number and a random online number generator was used to select the winner. Jean Rickard was the lucky prize winner on the day.

We reinvented the wheel for our quiz this year and used Slido. Slido is a free PowerPoint add on which enables you to create live polls, quiz competitions or Q&A sessions directly in your slides. You can customise it to show leader boards after quiz rounds. Participants join the quiz by scanning a QR code or logging onto the Slido webpage. No virtual event would be complete without the technology gremlin rearing his head and this year was no exception.

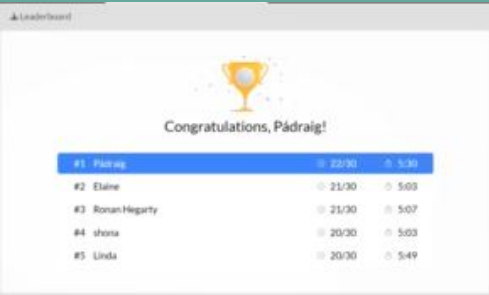

But after a short glitch when launching the quiz, Natasha's expertise proved victorious and thankfully we did not have to revert to Plan B (as we did not have one).

# HLI Staff Wellness Day 2022

(continued)

Congratulations, Pádraig!		
#1 Pádraig	22/30	5:39
#2 Elaine	21/30	5:03
#3 Ronan Hegarty	21/30	5:07
#4 Shona	20/30	5:03
#5 Linda	20/30	5:49

The introduction of a quiz leader board after each round resulted in some good natured rivalry among competitors. After a close competition with the lead changing before the last round, Pádraig Manning was declared the winner. Elaine Scanlon (runner-up) may argue that this was by default after she encountered a technical glitch before the last question which caused her to lose the top spot. Hard luck Elaine, better luck next year!

Eimear Feeney, Librarian in Mullingar County Library wrote two reviews for our Reader's Corner. The titles of the books reviewed were *Lying in Wait* (Liz Nugent) and *Boys Don't Cry* (Fiona Scarlett). Mary Thompson narrated the reviews.

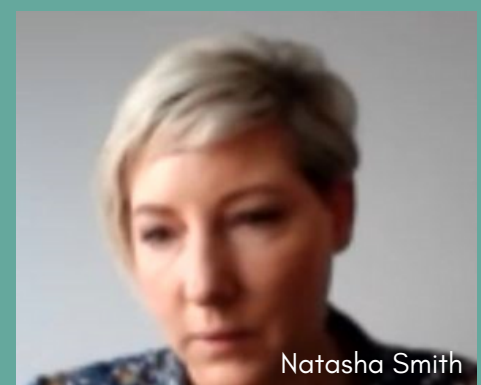

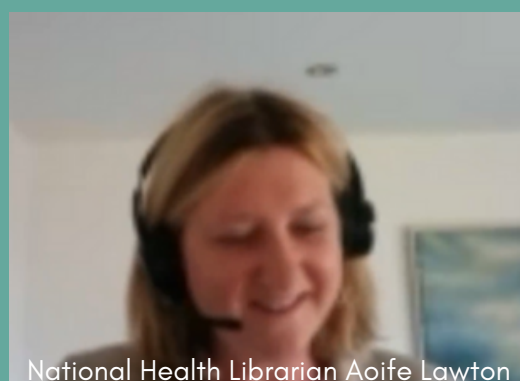

A discussion on current reading followed where participants engaged to recommend books they were currently reading or recommendations for books they had already read.

The prize for our final raffle was a €50 Amazon voucher kindly sponsored by BMJ. On this occasion Edel Kelly proved triumphant.

To bring our Wellness Day to a close we compiled a comedy video featuring clips from *The Live Mike*, a legendary Irish comedy programme from the early 1980's. This provided everyone with a good laugh and ended the day on a light, feel-good note.

The Events Team would like to thank Aoife for sponsoring the three prizes for the quizzes and The Book Nest and BMJ for sponsoring the raffle prizes.

Finally, a large bualadh bos to all the Health Library staff who joined the event and engaged on the day to make it a success.

Left and above: screen grabs of some of the participants at the Wellness Day

# Makerspace MRH Tullamore – Create, Collaborate, Innovate

Healthcare staff are continuously innovating and changing the way they work. Makerspaces provide tools and resources to support creativity, collaboration and innovation.

Our MRHT Makerspace includes a variety of different tools and equipment, so we hope that there will be something for everyone.

We will be launching different elements of our Makerspace this year. First up is our Makerlab Trolley and Portable Case.

Both are full of tools and raw materials which can be harnessed to bring to life the idea that keeps coming to mind.

The Trolley and Portable Case can be borrowed and used in the Library or the co-located Education Centre. Use our booking link <https://hse-ie.libcal.com/reserve/tullmkl> to get started or contact [LibraryMRHT@hse.ie](mailto:LibraryMRHT@hse.ie) for more information.

We are looking forward to launching more Makerspace components in the coming weeks and months. Join our MRHT Makerspace Mailing List to learn about our new Makerspace launches and resources by contacting Maura on [Maura.Flynn@hse.ie](mailto:Maura.Flynn@hse.ie).

**Maura Flynn, Librarian**  
**Midland Regional Hospital Mullingar**

We would also love to hear from you if you're working on creative or innovative projects in healthcare that you'd like to share with us. We look forward to working with you to create, collaborate and innovate!

# UpToDate visits Regional Hospital Mullingar

Rob Thomas, Customer Success Consultant UpToDate was the guest speaker at Grand Rounds in Regional Hospital Mullingar on June 16th.

**Margaret Morgan, Librarian  
Midland Regional Hospital Mullingar**

The Chair of the Grand Rounds is Professor Shu Hoashi, Consultant Endocrinologist. The event was well-attended by staff including Consultants and NCHDs. Lunch was sponsored by Bristol Myers Squibb.

Rob demonstrated all aspects of UpToDate from access to finding the evidence summaries and how the regularly updated high quality, evidence can be used in the diagnosis and treatment of different conditions.

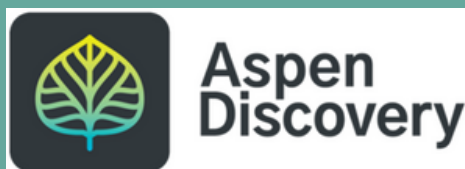

Question and answer session and discussion followed with some of the Consultants giving examples of situations UpToDate could be used in patient care.

# UpToDate®

## Digital Knowledge Services Update

**Niamh Walker-Headon  
Library Resources Manager**

Coming later this year: Aspen Discovery App

- One location for all your library needs. Search all library websites and materials both print and online.
- Integrates with your library account showing loans and holds.
- Responsive design & App.
- Your Koha account will now log you into OpenAthens

# Past and Present Rub Elbows at St Luke's Library

**Dymphna McGettigan, Librarian  
St Luke's Radiation Oncology Network**

St Luke's Radiation Oncology Network (SLRON) are in the process of developing the Gate Lodge as a patient wellbeing space and the renovations of the Gate Lodge might form part of the RTE series The Great House Revival. I undertook a research on the history of the Gate Lodge in the grounds of Oaklands / Rathgar House.

I contacted Royal Institute of Architects of Ireland and the Irish architectural archives but they do not have any specific reference to the existence of drawings for St Luke's/ Oaklands or the gate lodges on the grounds. The Gate Lodge was built by Charles Wisdom.

The printer and businessman Charles Wisdom Hely (1857-1929) lived at Oakland, now St. Luke's Hospital, Rathgar, along with his wife Edith Beech.

Interesting traces of heraldry connected to the Hely family can be seen today in many old structures about the grounds, especially on the gate lodge and main entrance.

SLRON library as can be seen from the picture is within Oaklands House and was possibly a drawing room or sitting room.

Architect and RTE 'Home of the Year' judge Hugh Wallace visited St Luke's Hospital library Rathgar on 25 May 2022 - pictured here with Jacqueline Robinson, General Manager SLRON Network and Dr Clare Faul, Clinical Director SLRON Network, outside the SLRON Library.

Meanwhile, Ruth Ryan (pictured, far left), Programme Manager NCCP and Professor Risteard O'Laoide (pictured, third from right), Director visited SLRON library to express thanks to all HSE librarians who have worked on research for NCCP guidelines now and in the past.

St. Luke's Radiation Oncology Network (SLRON) recently launched an ambitious new five year plan that focuses on ensuring the finest cancer staff and a commitment to research and technological innovation to provide the best possible care for patients.

The Network has three cutting-edge facilities in Dublin, located in Rathgar and at centres in St James's and Beaumont hospitals.

# Innovation Success: combining design thinking with healthcare

The HLI library at Our Lady of Lourdes Hospital has been busy yet again with a Sparks Design Thinking Workshop held on May 24th, 2022, thanks to Eleanor Campbell, Quality & Risk Safety Coordinator at Louth Hospitals who had the inspiration and the knowledge to deliver a successful workshop with the support of the HSE Sparks Innovation Programme.

Eleanor's objective was to bring HSE Sparks and Thinkactionable closer to Our Lady of Lourdes Hospital's frontline.

The workshop was facilitated by Martin Ryan, former Director of Undergraduate Studies in Design Innovation at Maynooth University; Author of ARRIVE - A Design Innovation Framework to Deliver Breakthrough Services, Products, and Experiences; proprietary inventor of the world's first cantilevered saddle and a multi-award-winning designer and entrepreneur.

Martin has featured in prominent international media and publications including RTE, CNN, The Guardian, and The Irish Times.

On the day, 14 enthusiastic healthcare participants were willing to discover the magic of #designthinking and new learning. The theme for the workshop was 'Waiting Lists' 'Waiting Areas'.

**Natasha Smith**

**Library Assistant, OLOLH Library**

Innovation Programme

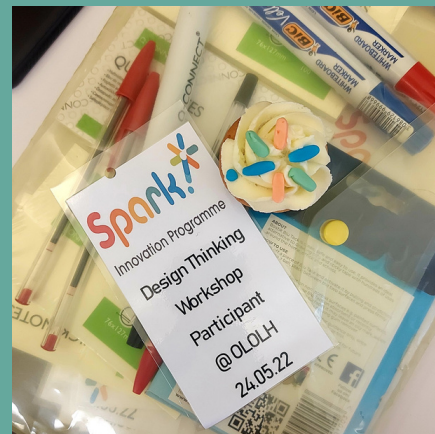

Martin started the morning off with an insightful presentation on innovation and the Design Thinking Process consisting of 7 stages: Audit, Research, Reframe, Ideate, Validation, and Execution. Which followed by the first task of 'How Might We' exercise.

**Leabharlann Sláinte na hÉireann**  
Health Library Ireland

Ár nAcmhainn Náisiúnta | Our National Resource

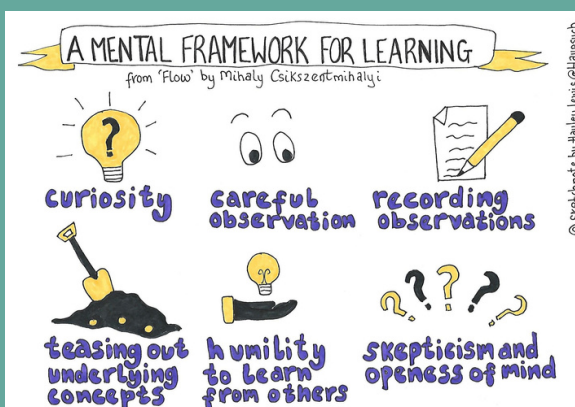

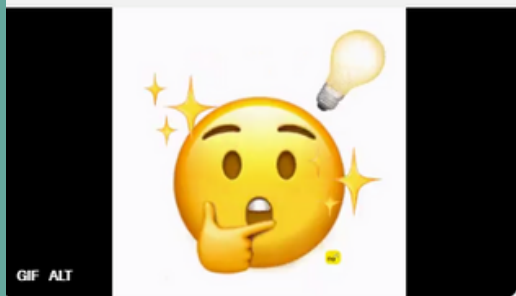

In the second challenge of the day, Eleanor sent participants in pairs out to different outpatients areas allocated within the hospital. For this task, they had to strike up a conversation with a patient or staff member. Ask 'How are you today?' and ask them to share their current experience(s) and their journey to that department. Healthcare participants arrived back with plenty of feedback and shared their observations.

The final challenge of the day set by Martin Ryan was for the participants to think about their solutions to resolving any issue identified during the second challenge and then put this into a tangible item with the help of using the HSE Makerlab Trolley.

The library was filled with a creative buzz instead of silence. It was lovely to hear participants ideating out loudly whilst creating their prototype.

All participants on the day outdid themselves. From Apps to Interactive Screens to Activity Bags, these were only some of the fantastic innovative ideas displayed on the day.

I'm attending @ProgrammeSpark design workshop at @NursingOlol today with @lillianbob. Really interested to understand how this will compliment our current approach to leadership and current workstreams #eHealth

If anything the Design Thinking Workshop has taught the healthcare frontline a new way of thinking and has shown solutions can become reality with innovative thinking and teamwork.

I would like to thank Eleanor Campbell and HSE Spark Innovation Programme for letting the Health Library Ireland be part of this event on the day. This is the first of many Design Thinking Workshops coming to HSE Health Library Ireland and Healthcare Frontline.
